

# Stockpile Evaluation

## Tonopah Test Range

- Since its establishment in 1957, the Tonopah Test Range has provided a complex outdoor laboratory for development, validation, and certification of U.S. Department of Energy (DOE) designed weapon systems and components
- The Tonopah Test Range mission is to provide Stockpile Evaluation and Research and Development (R&D) test support for DOE-funded weapon projects, as well as other Government agencies and their contractors

*Sandia is a multiprogram laboratory operated by Sandia Corporation, a Lockheed Martin Company, for the DOE, National Nuclear Security Administration under Contract DE-AC04-94AL85000*

*During a Work For Others (WFO) test, a surface-to-air missile is launched against a Man Portable Air Defense (MANPAD) Missile Warning System*

*Post-test activities include excavation and recovery of the buried B83 Joint Test Assembly*

*A B2 bomber drops a B61 Joint Test Assembly*
